# Declaration of AI assistance

Annals of Physics

Author-prepared disclosure; not an official publisher form or signature.

**Manuscript.** Residual-dimension obstructions for null-projected supersymmetric Yang-Mills theories

**Human authors.** Deep Bhattacharjee.

Claude Code assisted the original preparation. OpenAI Codex assisted proof auditing, the explicit helicity-span argument, the null-current lemma, scope corrections and editing. Explicit gamma-matrix programs supply supplementary numerical checks.

**Human oversight.** The submitting author stated on 25 October 2026 that the text is a mix of human-written and AI-generated material and that all parts have been checked and understood by a human. This records that author declaration. Human authors retain responsibility for mathematical accuracy, citations and the final version; AI systems are not human coauthors.

**Verification scope.** No general Lean formalisation is claimed. The proof is written in the manuscript; the gamma-matrix calculations are supplementary finite numerical checks.

**Supporting record.** The separate AI_PROVENANCE.md identifies the documented tasks and tools. No unprovided model version, human signature, confidential transcript or journal approval is asserted.

**Policy reference.** https://www.elsevier.com/about/policies-and-standards/generative-ai-policies-for-journals

Prepared on 25 October 2026. The author reviews this statement and completes any additional live-portal declarations before submission.
